### **DETAILED ACTION**

1. Amendment and response filed by applicants dated Oct. 5, 2006 have been entered and considered carefully.

Claims 1-33, 35-39, 41-51 have been canceled. Claims 34 and 40 are pending.

2. *Reason for Allowance*

The following is an examiner's statement of reasons for allowance:

Applicants has amended the claims to treating urticaria in human with a therapeutically effective amount in the range between 0.1-5mg per which will allow the contemplated multiple doses with lower range to achieve the maximum dose, thus, the 112 second paragraph is dropped. The amended range finds antecedent basis on page 14, lines 15-16, thus, the 112 first paragraph rejection is dropped. The argument that the Clissold reference, although disclosed treating human with 10 mg loratadine would constitute the *in situ* conversion to 5 mg DSL, the evidence also pointed to the "co-effectiveness" of loratadine and DSL. Since DSL has been clearly identified by Dr. Tarantino (see Declaration under 37 CFR 1.132) to have the unexpected benefit of less potency in promoting tumor growth than loratadine in the therapeutic range, the *in situ* dosage does not function *prima facie* obviously over the isolated administration of DSL because the *in situ* process will always be accompanied by the tumor promoting effect of co-administered loratadine. Claims 34 and 40 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
